

AUTOMATED VEHICLE DATA

ELIMINATE DRIVER INPUT ERRORS

THE SMARTFILL GEN 2 TELEMATICS MODULE.

No more frustrating errors from drivers' entries. This is a fully automated capability to generate 100% accurate vehicle data, at the point of every fuel transaction. SmartFill Gen 2 Telematics Module gives your admin team peace of mind and reduces a lot of running around, knowing that the data provided is accurate, and automatically becomes easy to report.

AUTOMATED

Easily installed under vehicle dashboards, the Telematics Module obtains accurate odometer and hour-meter data, sending a signal directly from the data-bus onboard the vehicle, to the SmartFill Gen 2 unit.

ACCURATE

A SmartFill Gen 2 Telematics Module means your fleet's fuel system's critical odometer & hour-meter data transfers the moment each vehicle is in range (100m) of the SmartFill Gen 2 unit. The data is automatically recorded and stored, prior to the fuel transaction starting.

MISTAKE FREE

With a SmartFill Telematics Module onboard, the mistakes stop. Drivers don't need to worry about logging odometer & hour meter readings. SmartFill Gen 2 does it immediately, automatically & accurately.
