

**PUMPS**

**Vane pump**

Vane positive displacement pump, constant flow, silent, robust and high performance.

Especially suitable for storage of all kind of non-abrasive liquids, and do not have solid particles in suspension. Equipped with two mechanical seals and two bearings.

Deliverable to flow 100L/min

Up to 1900 L/min, in bare shaft, with electric or diesel engine.

**Cobra pump**

In aluminum, bare shaft or hydraulic incorporated engine. Special for mobile refueling units, lightweight, with no vibration.

Adjusted with JIG because it has not any incompatible material with aviation fuel.
